2. Rayhan Alfarizi

Date of Submission: April 17, 2024

CERTIFICATE

This is to certify that this report titled "Q Restaurant UI/UX Design" embodies the original work done by Muhammad Alfi Luthfan Thufail, Rayhan Alfarizi Project in partial fulfillment of their course requirement at NIIT and CEP CCIT-FTUI UI.

Coordinator:

Susi Maulidiah

ACKNOWLEDGEMENT

Praise the presence of Allah SWT for his permission, so that the author can complete the project with the title "Q Restaurant UI/UX Design". Appreciation and thanks to the writer give to Mrs. Susi Maulidiah as a faculty of class 4SE1 and other teaching staff who always help. Thank you also to fellow students who have supported and also thank you for being a colleague in education at CCIT-FTUI.

The task of this project the author made with the aim to complete the assessment of learning in CCIT-FTUI. With this paper the author hopes to provide benefits to readers and listeners so as to increase knowledge and insight.

Finally, the writer realizes that this project is far from perfect. Therefore, the authors request suggestions and criticisms that are constructive for perfection and hopefully useful for us all.

BACKGROUND

In recent years, the food industry has witnessed a significant shift towards digitalization, driven by the growing demand for convenience and efficiency among consumers. In response to this trend, an increasing number of restaurants have embraced technology to streamline their operations and enhance the customer experience. One such innovation is the emergence of food ordering applications, which allow users to browse menus, place orders, and arrange deliveries with just a few taps on their smartphones.

The proliferation of food ordering apps has transformed the way people dine, offering unparalleled convenience and flexibility. However, amidst the crowded landscape of food delivery platforms, there remains a niche for applications that cater specifically to the needs of customers who prefer takeaway and delivery services. Recognizing this gap in the market, we introduce Q Restaurant a cutting-edge mobile application designed to revolutionize the way people experience dining.

Q Restaurant is not just another food delivery app it's a culinary companion that combines gourmet dining with the convenience of digital technology. Our app is tailored to meet the needs of modern consumers who seek high-quality meals that can be enjoyed in the comfort of their own homes or offices. With a focus on takeaway and delivery services, Q Restaurant aims to provide a seamless and hassle-free dining experience for busy individuals and families alike.

TECHNOLOGY USED

Technology used to support our project:

1. Figma

Figma is a vector graphics editor and prototyping tool primarily web-based, with additional offline features enabled by desktop applications for macOS and Windows. The Figma mobile app for Android and iOS allows viewing and interacting with Figma prototypes on mobile devices in real time.

2. Canva

With the help of the app Canva, one can create eye-catching visual content without having much experience with graphic design. Among the many visual assets that can be produced with the tool are social media posts, movies, slideshows, posters, artwork, and drawings.

3. Whimsical

With the help of Whimsical, the wireframe of the Q Restaurant application can be systematically designed, showcasing intuitive navigation, easily understandable interface interactions, as well as precise placement of key elements such as buttons, forms, and other content.

USER PERSONA

Lisa, School Teacher

1. Demographics: Female, 30 years old.
2. Background: Lisa is motivated by the convenience of ordering meals from her smartphone, enabling her to enjoy restaurant-quality food without leaving home or disrupting her teaching schedule.
3. Goals: By understanding Lisa's needs, challenges, and motivations, we can tailor the Q Restaurant application to provide a user-friendly and convenient dining experience that meets her expectations as an elementary school teacher with a busy lifestyle.

Farhan, Working Professional

1. Demographics: Male, 35 years old.
2. Background: Farhan values convenience and efficiency in his daily activities, including meal planning and dining options. He enjoys trying out different cuisines and exploring new restaurants, but his hectic schedule leaves him with limited time for cooking or dining out.
3. Goals: Farhan seeks convenient dining solutions that fit his busy lifestyle, including takeaway and delivery options that allow him to enjoy restaurant-quality meals at home or at the office.

STYLE GUIDE
